## About me

I'm a Semi Senior Full Stack Developer, passionate about technology, with more than two and a half years of experience working with applications and websites using modern frameworks such as VueJS, ReactJS, NuxtJS.

If there's something I've learnt from my experience is that team work is the right way to achieve quality learning and continuous improvement.

I worked at EducacionIT for a few years, and my role was to develop and maintain the company's applications and products using VueJS, NuxtJS, JS, Typescript, Docker, AWS. Also I participated in new challenges in order to improve my back-end knowledge by building REST APIs in Node.js / Typescript / Sequelize.

At the moment I'm working at Navent, as a Full Stack Developer, developing Android Native Mobile apps in Kotlin.
